## DETAILED ACTION

### *Allowable Subject Matter*

Claims 9-14, 21-29 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art, either singularly or in combination, fairly teaches or suggests applicant's claimed invention wherein applicant recites:

As per claim 9:

modifying the logratio value based on a programmable value of a knob to produce a modified logratio corresponding to a shortened footprint of the pixel in texture space in order to reduce the number of texture samples used during anisotropic filtering.

As per claim 21:

determining the number of texture samples read from the texture map corresponding to LODfine using the modified logratio value, wherein the number of texture sample corresponding to the modified logratio value is less than a number of texture samples corresponding to a logratio value that is computed as the base- two log of a ratio of a major axis length of the footprint of the pixel in texture space to the minor axis length of the footprint of the pixel in texture space.

As per claim 25:

determining the number of texture samples read from the texture map corresponding to LODcoarse using the modified logratio value, wherein the number of
